## PROFILE

As a highly motivated software developer, I am passionate about continuously expanding my skill set. Web development is like solving a puzzle, and I approach it with tenacity and persistence. My fascination with website construction dates back to my youth. My ultimate goal is to build a website that has a significant impact on users and becomes a staple in their daily lives.

## LANGUAGES

- JavaScript
- TypeScript
- Java
- Selenium
- React
- Node
- Express
- MySQL
- Jest
- HTML
- CSS
- SASS

## SKILLS

- Scrum
- Agile Development
- GitHub
- AWS
- Web APIs
- User Authentication

## EXPERIENCE

---

### Software Developer | Rebel

JAN 2023 - APR 2023, Ottawa, Canada

- Collaborated with a team of software developers to identify and resolve bugs in a full-stack web application using React, Node.js, and TypeScript, resulting in improved performance and user experience.
- Worked on the backend development of a large-scale web application, using .NET and SQL Server to support new features and functionality.
- Provided valuable feedback in code reviews to improve software development efficiency.

### Front-End Developer Intern | Unicorn Labs

MAY 2022 - DEC 2022, Ottawa, Canada

- Developed web products in collaboration with web designers, back-end developers, and UX designers.
- Created reusable code to reduce the time required to complete future projects by adding to the company's code database.
- Utilized Javascript frameworks to design and develop web applications for leadership assessment tools.

### Software Developer | QuickTo

APR 2021 - APR 2022, Ottawa, Canada

- Utilized expertise in tools like Maven and Git repositories to streamline software delivery processes, ensuring efficient integration and continuous improvement.
- Demonstrated in-depth proficiency in Core Java and Selenium to develop and execute robust test scripts, ensuring the delivery of high-quality software solutions.

## PROJECTS

---

### Lead Coder | The Office Quiz

October 2022

- A full-stack quiz game based on the show The Office built with React. The application stores the player's name and score in MySQL database and then displays them from highest to lowest on the leaderboard page.

### Collaborative | InStock

June 2022

- A full stack application that four web developers worked on to create a warehouse website using React that lists all inventories and can add, edit or remove items from warehouses stored in MySQL database

## EDUCATION

---

### BrainStation | Diploma, Web Development

APRIL 2022 - JULY 2022, Ottawa, Canada

### Code Youth | Certificate, Web Development

DEC 2021 - FEB 2022, Ottawa, Canada
